NOVASBIO Tubes and StripTubes are produced using only the finest medical grade polypropylene and certified free from DNase, RNase and Human DNA.

0.2ml PCR Tubes

0.2ml PCR Strip Tubes and Caps

0.2ml PCR Strip Tubes with individual Caps

- 0.2ml Tubes and 0.2ml StripTubes fit virtually all thermal cyclers
- Available with Frosted Flat for writing on, and Optically Clear Flat for Real Time PCR
- Optically Clear available either enlarged, completely flat or with a recessed window to minimise finger contact when closing – improves clarity and enhances signal for fluorescent, luminescent and real-time PCR applications
- StripTubes with attached Individual Tube Caps prevent cap lids and hinges from interfering with each other, allowing for easier handling in an SBS format rack, plus access to individual tubes
- Tight fitting design eliminates sample evaporation or ‘popping’ while still being easy to open
